Chapter 1

Introduction

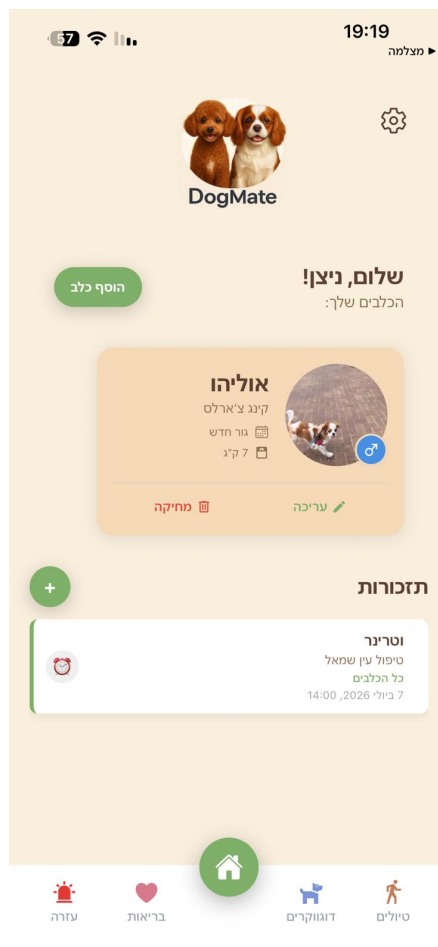

Note: DogMate is currently available for iOS only. Download it from the Apple App Store.

DogMate is a comprehensive mobile application designed to simplify and enhance every aspect of dog ownership and professional dog walking. Built for casual dog owners and professional dog walkers alike, DogMate brings together health tracking, social connectivity, and walk management into a single, intuitive platform.

Whether you are managing your dog's medication schedule, tracking vaccination history, monitoring food inventory, or looking to connect with fellow dog owners in your neighborhood, DogMate provides everything you need — in one place.

What You Can Do with DogMate

Dog Profile Management	Create and manage profiles for one or more dogs, including breed, age, weight, and photo.
Health Tracking	Record medications, vaccinations, and dietary needs with automatic countdown reminders.
Walk & Social Features	Start a walk, discover nearby dogs on a live map, and send pings to arrange meetups.
Food Inventory	Monitor food stock and daily consumption to avoid running low.
Smart Reminders	Set automated and custom reminders so nothing is ever missed.
Emergency SOS	Instantly locate and call the nearest veterinary clinic with a single tap.
Dog Walker Tools	Manage working hours, service areas, and view client reviews.

The DogMate Home screen — dog profile card, upcoming reminders, and bottom navigation bar.

Chapter 2

Getting Started Registration & Login

When you first open DogMate, the welcome screen presents two options: Log In for existing users, and Register for new users. Your account stores all your dogs, health records, and settings securely in the cloud.

2.1 Creating a New Account

Registration takes less than a minute. During sign-up you will choose your account type — Dog Owner or Dog Walker — which determines which features are available to you after signing in.

1	Open DogMate and tap "Register" The registration form opens.
2	Enter your first name Your first name as you would like it to appear in the app.
3	Enter your last name Your family name.
4	Select your account type Choose Dog Owner or Dog Walker. This determines which features you can access.
5	Enter your date of birth Tap the date field and select your birth date from the calendar.
6	Enter your phone number (optional) A mobile number for contact purposes — not required.
7	Enter your email address This will be your login username going forward.
8	Create a password Enter a secure password and confirm it in the field below.
9	Tap the arrow to complete registration Your account is created and you are taken to the Home screen.

Registration form — enter your name, account type (Dog Owner or Dog Walker), date of birth, email, and password.

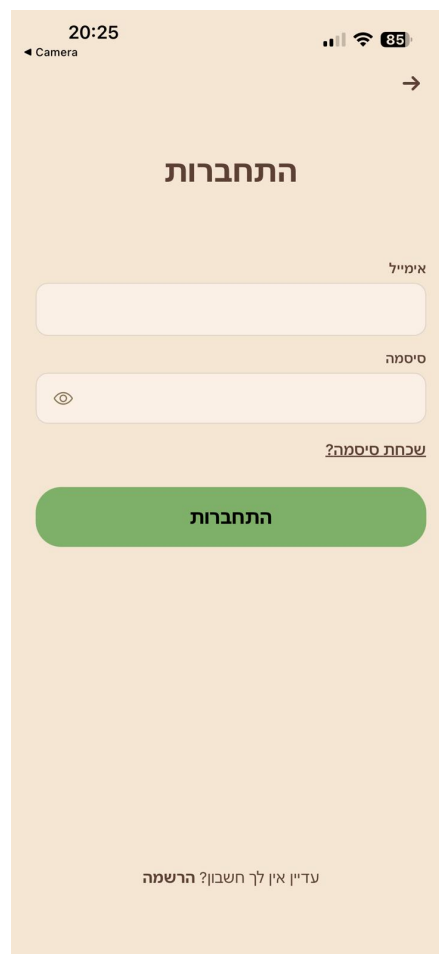

Tip: Choose your account type carefully at registration. Dog Walkers gain access to the professional dashboard, service management, and client review features.

2.2 Logging In

If you already have a DogMate account, logging in requires only your email and password. A Forgot Password link is available on the login screen if you need to reset your credentials.

1	Open DogMate and tap "Log In" The login form opens.
2	Enter your email address The email you used during registration.

3	Enter your password Tap the eye icon to show or hide your password as you type.
4	Tap "Log In" You are taken directly to the Home screen.
5	Forgot your password? Tap the "Forgot Password?" link below the password field to reset it via email.

Login screen — enter your email and password, then tap Log In. Use "Forgot Password?" to reset your credentials.

Tip: No account yet? Tap "Register" at the bottom of the login screen to create one.

Chapter 3

Adding Your Dog

After registering, the first step is to add your dog's profile. All health records, walk logs, and reminders are linked to a specific dog. Multiple dogs can be added to a single account at any time.

How to Add a Dog

1	On the Home screen, tap "Add Dog" The green button appears in the top-left corner.
2	Add a photo (optional) Tap the camera icon to upload a photo of your dog.
3	Enter your dog's name Type the name in the first field.
4	Enter the date of birth Tap the date field and select from the calendar. Tap "New Puppy" if born today.
5	Enter the breed Type the breed name in the breed field.
6	Enter the weight Enter your dog's current weight in kilograms.
7	Select gender Tap Male or Female.
8	Tap "Save and Let's Go!" The profile is created and linked to all features immediately.

The Add Dog form — enter name, date of birth, breed, weight, and gender, then tap Save and Let's Go!

Tip: You can edit or delete a dog's profile at any time from the Home screen using the Edit and Delete buttons on the dog's profile card.

Chapter 4

Health Management

The Health section centralises your dog's medical history, active treatments, upcoming vaccinations, and nutritional needs. Access it by tapping the Health (heart) icon in the bottom navigation bar.

4.1 Medications & Treatments

The Medications screen lists all active and past treatments per dog. Each card shows the medication name, date last administered, and a countdown to the next dose. The countdown turns red when a dose is due imminently.

Adding a New Medication

1	Tap the green + button Top-left corner of the Medications screen.
2	Select your dog Choose which dog this medication belongs to.
3	Choose the medication type Select from the dropdown list of treatment categories.
4	Enter the medication name Type or select from history — DogMate auto-suggests previous entries.
5	Set the administration date Defaults to today; tap the calendar to change it.
6	Set the next dose date Tap the calendar to schedule the next dose.
7	Add vet or clinic name Optionally record the prescribing veterinarian.
8	Tap Save The record is added to your dog's health history immediately.

Medications list with countdown to next dose

Add Medication form

Smart Medication Autocomplete

When entering a medication name, DogMate automatically suggests previously used medications for that dog — saving time and ensuring consistent naming across records.

DogMate suggests previously used medication names as you type.

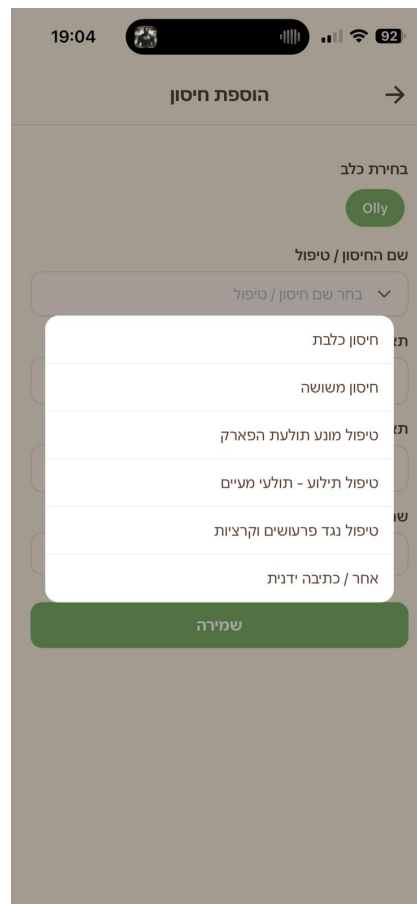

4.2 Vaccinations

The vaccination module maintains a complete immunisation record and alerts you ahead of upcoming boosters. This record is essential for vet visits, dog parks, and kennels.

1	Navigate to Health, then My Vaccinations Tap the syringe card on the Health screen.
2	Tap the green + button Opens the Add Vaccination form.
3	Select your dog Choose the dog from the selector at the top.
4	Choose the vaccine type Select from the dropdown — includes Distemper, Rabies, Parvo, Tick treatment, Deworming, and more.
5	Enter the administration date Record the exact date the vaccine was given.
6	Set the next booster date DogMate automatically displays a countdown from this date.
7	Add vet or clinic name Optionally record where the vaccination took place.
8	Tap Save The record appears in the vaccination history immediately.

*Vaccination list with
days-to-next-booster countdown*

*Add Vaccination — select from a full list
of vaccine types*

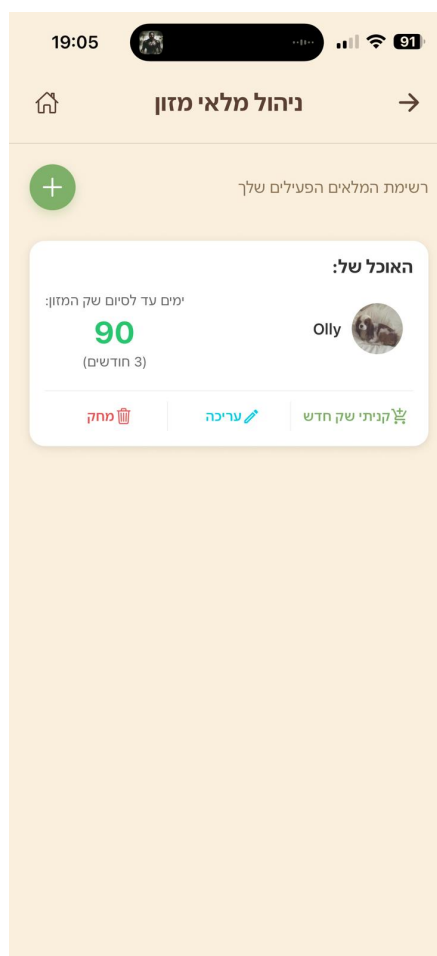

Tip: Always enter the next booster date — DogMate will automatically remind you as the date approaches.

4.3 Food Inventory Management

The food inventory tracker monitors your dog's food supply and daily consumption. It calculates how many days of food remain and alerts you well before supplies run out.

Key Features

- Days of food remaining are displayed prominently in green on each food card.
- Tap "I Bought a New Bag" to log a restock and reset the day countdown.
- Tap "Edit" to update the current stock amount or daily intake settings.
- Tap "Delete" to remove a food record entirely.

Food Inventory — days remaining shown in green, with options to edit, restock, or delete.

Tip: Tap "I Bought a New Bag" as soon as you restock so the day-count stays accurate.

Chapter 5

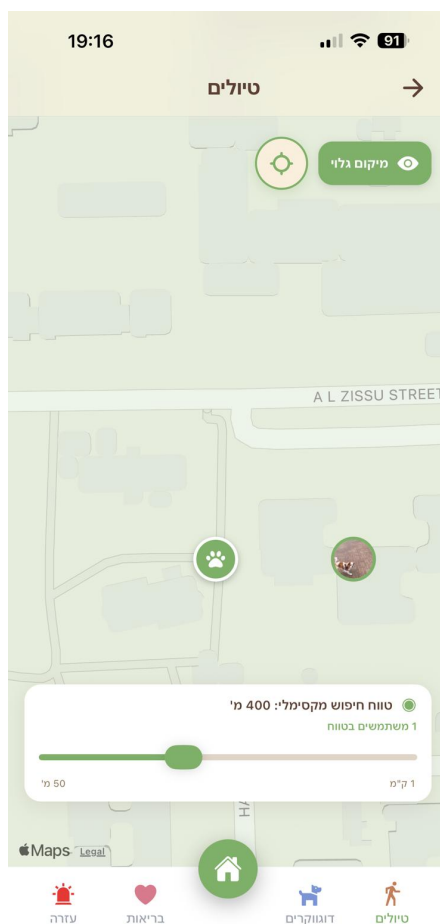

Walks & Social Features

DogMate shows nearby dogs on a live map during walks, allowing you to send connection requests and arrange meetups with other dog owners in real time.

5.1 Going on a Walk

Tap the Walks icon in the bottom navigation bar to open the walk screen. The live map displays nearby dogs as markers. A radius slider at the bottom lets you control your search range — from 50 metres up to 1 kilometre.

1	Tap the Walks icon in the navigation bar The walk screen opens with a live map.
2	Tap "Reveal Location" Your location becomes visible to nearby DogMate users.
3	Adjust the search radius Use the slider at the bottom to set your preferred range (50m to 1km).
4	Browse nearby dogs Dog profile photos appear as map markers — tap any for details.
5	Hide your location Tap "Reveal Location" again to stop sharing your position.

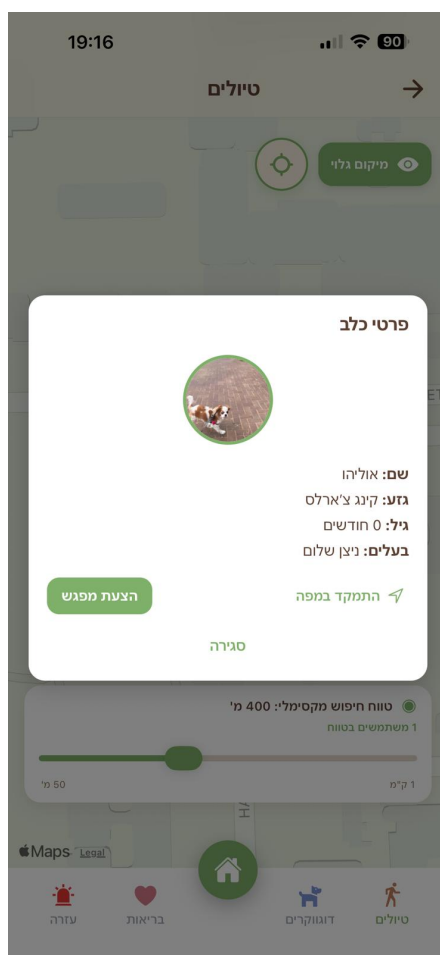

Walk map — your location (paw icon) and nearby dogs shown in real time. Adjust the radius slider to expand or narrow your search.

5.2 Finding Nearby Dogs & Sending a Ping

Tap a dog marker on the map to open their profile card, which shows the dog's name, breed, age, and owner name. Tap "Propose Meeting" to send a friendly connection request. The other owner receives a push notification and can accept or decline.

1	Tap a dog marker on the map The dog's profile card opens as a popup.
2	Review the dog's details Name, breed, age, and owner name are all displayed.
3	Tap "Propose Meeting" A connection request is sent to the other owner.

4	Wait for a response The other owner receives a notification to accept or decline.
5	If accepted Both parties can see each other's contact details and arrange a meetup.

Dog profile card — name, breed, age, and owner details. Tap "Propose Meeting" to send a ping.

Tip: Contact details are only shared after both parties accept the request — your privacy is always protected.

Chapter 6

Reminders

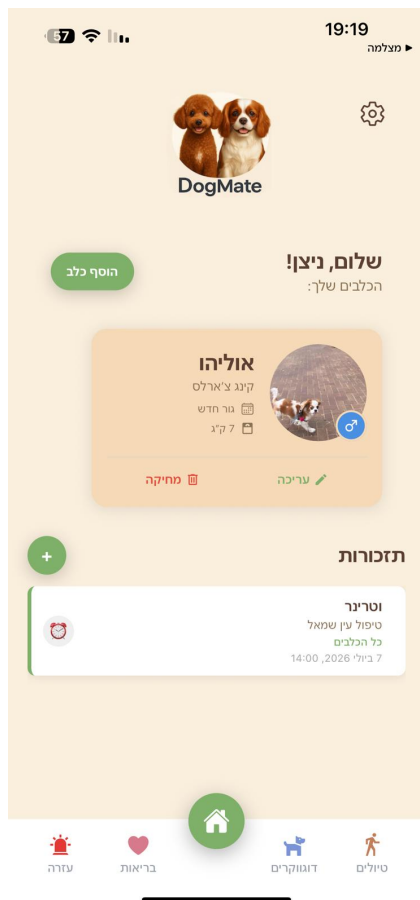

DogMate's reminder system ensures no important event in your dog's routine is overlooked. Reminders appear directly on the Home screen and can be added or managed using the + button next to the Reminders section.

Types of Reminders

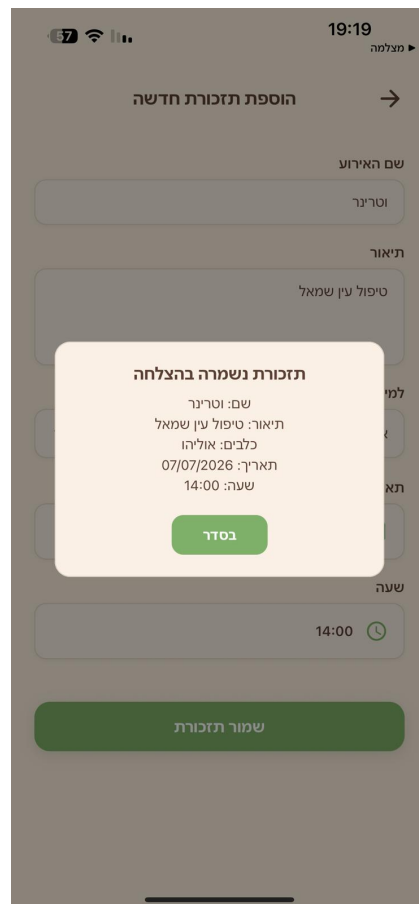

- Medication reminders — automatically created from active medication records.
- Vaccination boosters — automatically generated when a next-booster date is set.
- Custom reminders — created manually for vet appointments, grooming, or any event.
- Food stock alerts — triggered when inventory falls below your defined threshold.

How to Add a Custom Reminder

1	Tap the + button next to Reminders on the Home screen Opens the Add Reminder form.
2	Enter the event name For example: "Vet appointment" or "Grooming session".
3	Add a description Describe the event in more detail if needed.
4	Assign to a dog Choose which dog — or all dogs — the reminder applies to.
5	Set the date and time Tap the date and clock fields to schedule the alert.
6	Tap "Save Reminder" A confirmation popup shows the full reminder details. Tap OK to confirm.

Home screen — reminders listed below your dog's profile card

Add Reminder form with confirmation popup before saving

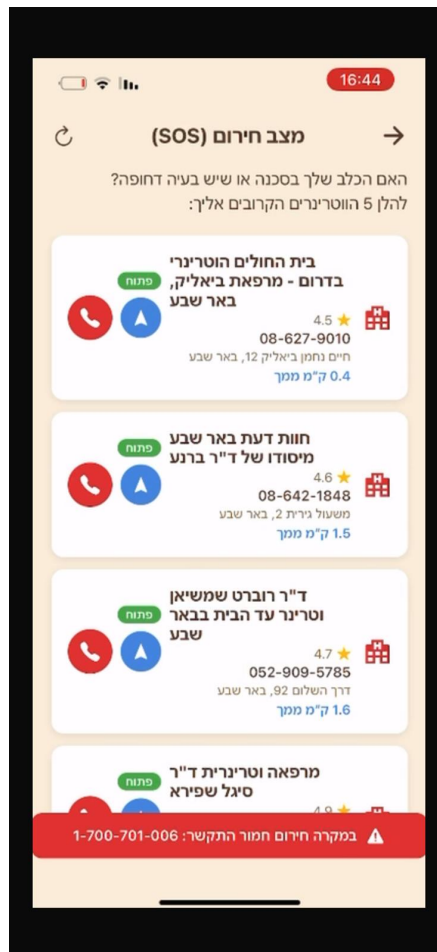

Tip: Allow push notifications in your device settings so DogMate can alert you even when the app is running in the background.

Emergency SOS Button

The SOS feature is designed for veterinary emergencies. With a single tap, DogMate uses your GPS location to identify the five nearest veterinary clinics and displays them instantly — with phone numbers, ratings, addresses, distances, and open or closed status.

How to Use the SOS Button

1	Tap the red alert icon The SOS button is the first icon in the bottom navigation bar — always accessible from any screen.
2	View nearest clinics DogMate instantly shows the 5 nearest veterinary clinics, sorted by distance.
3	Tap the green phone icon Places a direct call to that clinic immediately.
4	Tap the blue navigation icon Opens turn-by-turn navigation to the clinic address.

SOS screen — 5 nearest vet clinics with open/closed status, ratings, phone numbers, and distance. One tap to call or navigate.

Important: The SOS feature requires location services to be active on your device. Set DogMate's location permission to "Always Allow" so it works even when the screen is off. For severe emergencies, the national veterinary emergency line is shown at the bottom of the SOS screen: 1-700-701-006.

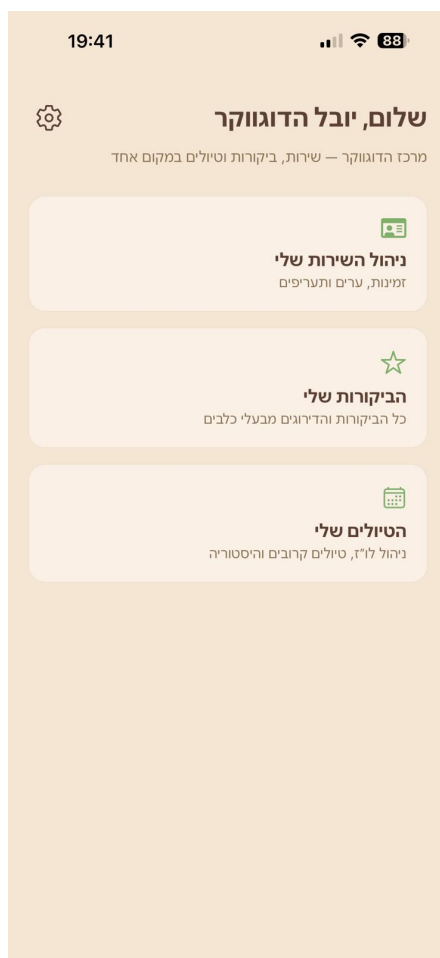

Chapter 8

Dog Walker Features

DogMate includes a dedicated professional toolkit for dog walkers. Manage your schedule, define service areas, build your reputation through client reviews, and track your walks — all within the same app used by your clients.

8.1 Dog Walker Dashboard

The Dog Walker dashboard is your professional control centre. It displays your name and gives quick access to three core sections: Service Management, My Reviews, and My Walks.

Dog Walker dashboard — your central hub for managing services, reviews, and walk history.

8.2 Setting Availability & Service Areas

Define your working hours, service location, and pricing per walk. This information is visible to dog owners searching for professional walkers nearby. You can add multiple service rows to cover

different cities or time slots.

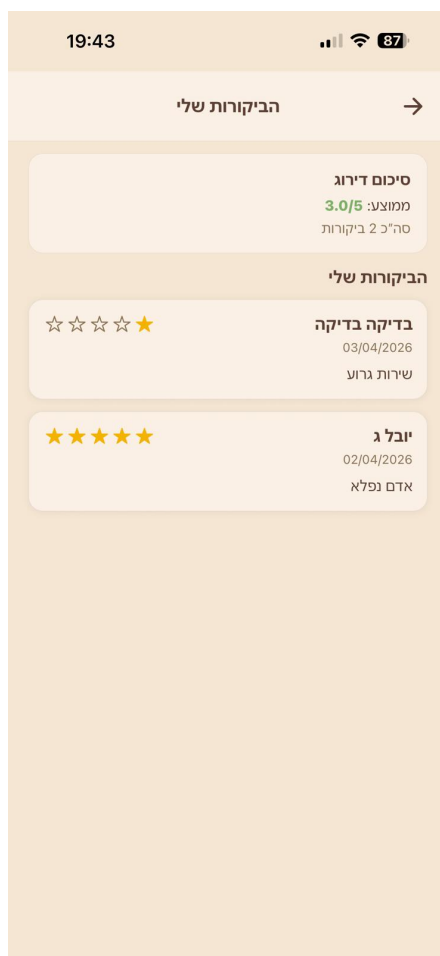

1	Tap "Service Management" on the dashboard Opens the availability and pricing form.
2	Set your location type Choose between City or Zone for each service entry.
3	Select the city or area Choose from the dropdown list.
4	Set your working days Tap each day of the week to toggle it on or off.
5	Set your available hours Enter your start and end times.
6	Set your rate Enter the walk duration and your price per walk.
7	Tap "Add and Save" The service row is saved and your profile is updated immediately.

Service Management — set your location, working days, hours, and pricing. Multiple service rows are supported.

Tip: Add multiple service rows to cover different areas or time slots. Each row can be deleted independently using the X button.

8.3 Viewing Your Reviews

After completing walks, clients can leave star ratings and written reviews on your profile. The Reviews screen shows your overall average rating, total review count, and each individual review with the reviewer's name, date, and star rating.

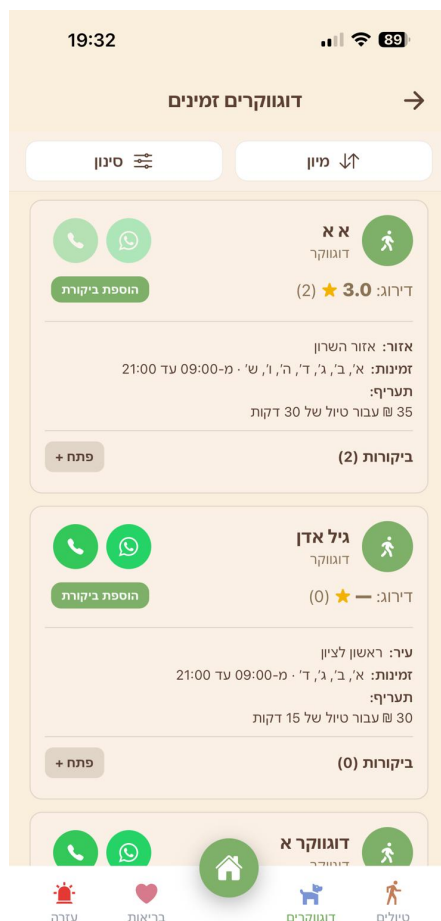

My Reviews — overall rating summary and individual client reviews with star ratings and dates.

Tip: A complete profile with defined hours, clear service areas, and strong reviews significantly increases your visibility to dog owners on DogMate.

8.4 Finding Dog Walkers (Dog Owner View)

Dog owners can browse and contact available walkers directly from the Dog Walkers tab in the bottom navigation bar. Each card shows the walker's service area, working hours, pricing, star rating, and review count. You can call or message them directly from the card.

Available Dog Walkers — browse by rating, service area, hours, and pricing. Call or message directly from each card.

Tap "Add Review" on any walker card to leave a rating after a completed walk. Expand the Reviews section on each card to read all existing client feedback.

Tips & Best Practices

Keep health records current

Update medication and vaccination records promptly after each vet visit. Accurate records ensure your automatic reminders remain reliable.

Enable all notifications

Allow push notifications in your device settings for medication alerts, pings, and reminders. DogMate's value increases significantly with notifications active.

Grant location access

Set location permission to "Always Allow" so the walk, social, and SOS features work correctly — even when the screen is off.

Use medication autocomplete

When adding a medication, DogMate suggests names from your dog's previous records — saving time and reducing entry errors.

Review food inventory weekly

Checking stock once a week prevents last-minute shortages, especially if your dog is on a prescription diet.

Tap "I Bought a New Bag" promptly

When you restock your dog's food, update DogMate immediately so the day-count stays accurate.

Dog walkers: keep your profile updated

Update your availability regularly. An outdated profile can result in missed opportunities with dog owners seeking professional walkers.

Multiple dogs: always check the selector

Confirm the correct dog is selected before adding any health records. The dog selector is available throughout the app.

Use the walk radius slider

On quieter days, expand the search radius on the walk map to discover more dogs in your area.

*Thank you for using DogMate. We are committed to making dog ownership simpler, more organised, and more social. For support or feedback, visit **dogmate.app**.*
